

PROGRESS 2008

Continued from previous page

Musco Completes World's Largest Permanent Lighting Project: Musco members worked with an international team in extreme weather conditions to light the Losail International Circuit in Doha, Qatar. The project took 175 days, from design to install, and required drilling and trenching through 7.5 miles of rock to lay over 310 miles of wiring.

carbon dioxide emissions since it was introduced in January 2005, the equivalent of taking over 14,000 cars off the road.

Musco celebrated landmark projects during 2007, including the lighting of the world's largest (215,000 sq. ft.) billboard in the United Arab Emirates and the lighting of stadiums for the Washington Nationals, the Los Angeles Dodgers, and the Sprint Center arena in Kansas City, Mo. Musco lit the first night horse race in Ireland at Dundalk Stadium, as well as 20 golf courses in Korea.

Equally important are the many Iowa fields Musco Team members work with closer to home. During 2007, Iowa projects include Ackley (AGSWR) football and baseball/softball, Belmond Klemme baseball/softball, Brooklyn (BGM) baseball, BCLUW football, Moravia baseball, New Sharon Little League, Neola baseball, North Fayette football, Pella Christian baseball, Sigourney football, baseball and softball, and Urbandale football/soccer. The Musco Team also partners with these

communities, when feasible, to provide volunteer installation assistance.

In September, Musco celebrated an important milestone — the 25th anniversary of Musco Mobile. President Joe Crookham has called September 18, 1982, “arguably the most significant day in Musco’s history.” It was Musco Mobile’s first event lighting the Michigan vs. Notre Dame football game in South Bend. The Team came together to design, build and test the first mobile trucks in a very short timeframe to get the job done.

During its 25-year history, Musco Mobile has continued to “Make It Happen,” logging more than five million over-the-road miles, traveling to four continents, for 677 football telecasts and over 2,500 live telecasts, and many dozens of movies.

In an anniversary memo Crookham said, “Some events are the stuff of nearly magic, others are tragic, but getting the world’s attention began ‘the night the lights went on at Notre Dame.’” During 2007, the Musco Mobile Team traveled to 43 states and four Canadian Provinces

and supplied temporary lighting for over 230 projects including 250 hours of live television.

Musco customer support services continue to grow and distinguish Musco from its competitors while also helping to build relationships with customers. Musco’s Control-Link® operation grew by 30 percent, and the Control-Link Team in Oskaloosa now oversees over 78,000 system schedules annually. The Team works 24/7, 365 days a year providing assistance to customers around the world. Another customer support team, Lighting Services, traveled over a million miles in 2007 providing maintenance and fine tuning to customers.

Musco Team members have logged over 215,000 miles in the company plane to serve accounts and to respond to customer needs quickly. This is the equivalent of two trips across the U.S. each week. The plane allowed us to bring over 100 visitors from around the world to Oskaloosa during 2007, to show them firsthand what our Team is able to do and to develop relationships. Visitors are impressed with amenities such as Internet speed and availability, and hometown quality of architecture, dining and customer service in Oskaloosa.

“Mahaska Communication Group continues to be important to be Musco’s ability to do business around the world,” said Jeff Rogers, Vice President for Developmental Sales. “It also allows us to watch telecasts of our kids and share them with relatives.”

The Musco Team is committed to helping athletes and park patrons have fun under lighting that improves safety and playability, while providing energy efficiency and operating savings. Activity and achievement in these markets provided the Team with a great year in 2007. Profit sharing in 2007 for the Team topped 20 percent of annual wages for a second consecutive year.

In 2008, research on new technology and opportunities in global markets will be areas of focus. “I am proud to be part of the Musco Team and appreciate their efforts in making projects large and small happen,” said Crookham. “We are excited about the opportunities for 2008 and the years beyond.”

Oskaloosa Service Center, Inc.: Locally owned and operated since '96

Through the years, the Oskaloosa Service Center, Inc. has changed hands and changed names, but its quality service and convenient location have remained the same. Since its beginning as Van Hulzen Oil Company more than 50 years ago, Oskaloosa Service Center has stood in its same location at the corner of South First Street and Second Avenue East.

And now, as the Oskaloosa Service Center, Inc., owned and operated by Verlan (Fish) and Debra Eveland since 1996, that same heritage of quality is evident, long after the gas pumps were emptied. Oskaloosa Service Center offers tune-ups, complete oil and lubrication work, air conditioning and heating, electronic diagnostics and shocks and brakes for all foreign and domestic vehicles. OSC can also handle major overhauls of both engines and transmissions. They also sell a variety of truck and passenger car tires.

Without proper care and maintenance, no car

will run forever. In this area, wise motorists go straight to the experienced professionals at Oskaloosa Service Center, just a short distance from the Oskaloosa City Square and located at 201 Second Ave. East, Oskaloosa, Iowa. Their reputation is backed by years of excellent service and many satisfied customers. The quality technicians, Verlan (Fish) Eveland, Roger DeGroot, Zack Grubb and Kevin Groenendyk, have had years of experience in the automotive repair field and use only the latest factory-approved techniques. Today’s automobile is a major investment, so protect your investment by making sure only well-qualified people are entrusted with its care. With their expertise and today’s technology they will be able to add years to the life of your vehicle.

Oskaloosa Service Center, Inc. is open from 8 a.m. to 5 p.m. Monday through Friday, and 8 a.m. to noon on Saturday. For quality service or to inquire about work to be done, phone (641) 673-3329.
