

**Every Home Deserves The
Best in Clean, Comfortable Air.
Trane Makes It Affordable.**

**Control your comfort and energy
consumption -- all at once.**

Reward yourself everyday. Especially the hot ones.

Sometimes the best solution doesn't come from a single fuel source. Trane can customize your system for ideal efficiency using a combination of gas and electric technology. For instance, we can pair an electric air conditioner with a gas furnace. Or a gas furnace with an electric heat pump, which also cools your home in the summer. Regardless of the energy source, your system will be perfectly matched for your home, your climate and your budget.

Your new heating and cooling system will affect your comfort -- and energy usage -- for years to come. That's why we are committed to helping you find the best system for your needs. We conduct a detailed analysis of your home and ductwork, clearly explain your options, and provide installation and service, too. Some people might say we go the extra mile, but it's just how we like to do business. When you expect more you get more. It's that simple.

Call now for a free home comfort consultation.
