

Ron Jones, D.O.

DABIPP, FIPP

Diplomat, American Board of Interventional Pain Physicians

Interventional Pain Management is the discipline of medicine devoted to the diagnosis and treatment of pain related disorders principally with the application of interventional techniques in managing sub-acute, chronic, persistent, and intractable pain. Independently or in conjunction with other modalities of treatment.

We have the only out-patient interventional pain facilities in the Tri-County area. Easy in, easy out. No hidden hospital ambulatory surgical clinic fees. Fully equipped facilities for a safe Environment.

Conditions:

Acute and chronic spinal and	Neuropathic pain
Extremity pain	Osteoarthritis
Cervical spine disorders	Osteoporosis
Coccydynia	Sciatica
Degenerative disc disease	Spinal stenosis
Degenerative Spinal Conditions	Spondylolisthesis
Diabetic neuropathy	Thoracic spine disorders
Herniated disc	Trauma
Ligament strain	Whiplash
Lumbar spine Disorders	

Treatments:

Interventional Pain Management techniques are minimally invasive procedures, including percutaneous precision needle placement with placement of drugs in targeted areas or ablation of targeted nerves and some surgical techniques for the diagnosis and treatment of chronic, persistent, or intractable pain.
