IT'S NOT EASY BEING

CHEAP.

WHAT? CHEAP?

We've got to be kidding, right?

Energy isn't cheap - at least not in this day and age. But compared to what other people in Texas are paying for electricity, you're paying a lot less.

For example, if you're an average Sam Houston EC consumer, you'd pay \$80 more to Reliant Energy in Houston for the same amount of electricity. That is, if your Sam Houston EC bill was \$147.32, Reliant Energy would charge you \$227.42* for the exact same thing!

* Based on figures from www.powertochoose.org on Aug. 1, 2006

Sam Houston EC works hard every day to make sure that we provide you with low cost power. Here's just some of what we do:

- We team up with nine other East Texas cooperatives to purchase electricity at cost-effective bulk rates.
- We constantly search for the most cost-efficient fuel mix.
- We are continually improving our technology and building more efficient facilities to meet current and future needs.

Together, we have the power to make a difference.

Be efficient with your power whenever and wherever you can. If you use less, you'll pay less. You can find handy tips to energy savings for your home and your business that can help reduce your monthly bill on our Web site, www.samhouston.net.
